THE ULTIMATE HOME GAME.

Meet the Halo Series. We've redefined what a custom poker table can be, bringing unprecedented style to your space. Step up your hosting game and create unforgettable memories around a true masterpiece.

THE MIYA

MIYA (宮): [Me-yah]

Professional Stakes, Designer Approved. Most professional poker tables are eyesores that belong in a basement. The Miya is different. We built a furniture-grade, oval dining masterpiece that anchors your room with modern sophistication—then we hid a world-class tournament arena inside it. It's the only table that earns a "yes" from the spouse and "envy" from the players.

The Axiom

AXIOM (n.): [ak-see-uhm]

The New Standard of Play. Precision-engineered for the modern minimalist. The Axiom is a masterpiece of clean lines and elevated ergonomics, designed to prove that professional poker doesn't have to look traditional. It is a sleek, architectural statement that brings "Main Event" energy to any contemporary space.

THE STRATTON

STRATTON (N.): [STRAT-UHN]

The Boardroom Table for Your Best Home Game. Designed for the corner office and the private suite, The Stratton is a monolithic statement piece that commands any room it enters. This isn't just a poker table; it's a high-stakes anchor for your space. With its heavy-duty architectural base and bold, modern silhouette, The Stratton signals to your guests that they aren't just playing a game—they're part of an event.
